

"Every Gathering Needs an ICEBREAKER"

ICEBREAKER

RAW WATER

Our water source is a well with a depth greater than 100 meters. We are currently the only ice producers serving ice from a natural source and not from a tap.

FILTRATION SYSTEM

Using the latest in RO technology and Ozone purification, our water undergoes filtration, resulting in pure water that is perfect for crystal clear ice.

ICE PRODUCTION

Air is completely eliminated during the freezing process, making our ice an elegant touch to beverages.

STORAGE & DISTRIBUTION

Our storage facility is top of the line, with the best freezing machinery in the market. We have a range of trucks, cold rooms and freezers to satisfy client needs.

ICE IN EGYPT

The significant prevalence of ice in society is attributed to its many uses and necessities. It is considered part of our daily needs and is as important as the drinks they compliment in the hospitality industry.

Its uses range from household requirements in preserving foods to making ice cold drinks or beverages. It is essential for business establishments, such as restaurants and fast food chains, as well as festivities, social gatherings and banquet events.

OUR ICE BAGS

The perfect design

The Plastic Bag

Our bags are made using two different layers of plastic, polyethylene and polystyrene, giving them a strong and sturdy feel. The plastic also facilitates ...

The Handle

Our bags come with a comfortable handle that makes the bag easier to carry. In addition, the handle makes the bag a standalone item, which means it does not require to ...

The Easy-Tear

Our bags are heat-sealed after being filled, so that bags cannot be opened without removing the easy tear. This provides assurance to the customer and re-seller that ...

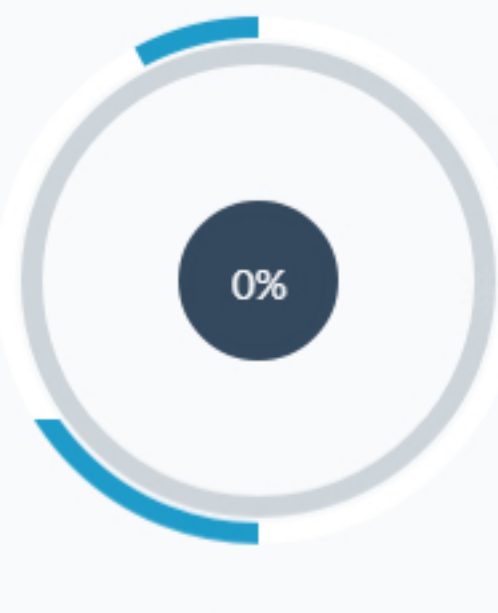

The Zip-lock

The zip-lock feature is a huge added benefit for the end user, as it allows the resealing and storage of the bags, keeping ice fresh and protected from contaminants or odors in the ...

Mohamed Hussein
Zwbedi co.

OUR TRANSPORTATION

Our ice is transported in the latest TFR and NPR trucks, with attached cold rooms that reach -18°C.

OUR GOURMET ICE CUBE

Crystal clear, slow-melting ice

After the water is filtered through the RO station and Ozone purification, Gourmet Ice Cubes are formed by spraying water into an inverted mold ...

Their unique shape means that these cubes are less prone to sticking together in the ice bucket or bags, and are therefore easier to handle than the more traditional square cube ...
