DESIGN YOUR GOLD WITH YOUR OWN DESIGN

As part of our ongoing commitment to providing products that suit all tastes, we are pleased to offer the services of "Bareq," a line that specifically produces customer orders and models with the highest levels of precision and professionalism. Engineer Yasser Othman oversees the "Bareq" production line, assisted by a team of Egypt's most skilled handmade jewelry makers. We also utilize artificial intelligence technologies to translate images of customer models into unique pieces of jewelry, each designed by the customer.
