

## Company Introduction

Emeco For Engineering Industries And Supplies Was Established In 2007 As A Leading Company In The Field Of Contracting Heating And Heating Systems Of Various Types Such As Steam Boiler Systems, Hot Water Boilers And Their Networks, And With The Growth And Development Of The Business, The Strategy And General Vision Of The Company Was Updated By Creating The Manufacturing Department In The Company With The Aim Of Maximizing Competitiveness And Increasing The Percentage Of The Local Component In The Volume Of Projects Implemented By The Company, And As A Result, The Metal Facilities Factory Was Established To Manufacture Boilers For Steam Boilers, Hot Water Boilers And Basic Components Of Heating And Heating Systems Such As Tanks And Heat Exchangers From Carbon Steel And Stainless Steel In Accordance With The Standard Specifications. Steam And Hot Water Boilers And Components Of Basic Heating And Heating Systems Such As Tanks And Heat Exchangers From Carbon Steel And Stainless Steel In Accordance With Standard Specifications And Industrial Quality Standards And Under The Supervision Of The Highest Accredited Regulatory Authorities In The Republic And Within The Framework Of The Policy Of Continuous Development And Expansion Of The Scope Of Work, Electromechanical Works Were Added, Including Fire Fighting And Alarm Works Of All Kinds, Sanitation, Ventilation And Centralized Laundries.

The Company's Management Has Always Been Keen To Attract The Best Human Cadres And Skilled Labor Needed To Cover The Entire Scope Of Work, Starting With Calculations, Engineering Designs, Measurements, Bills Of Quantities And Supply Work Through The Most Famous International Manufacturers, In Addition To The Installation Work And Include The Necessary Tests Until The Project Is Handed Over To The Owner's Consultant.

Our Expertise Stems From The Number, Size And Type Of Projects That We Have Successfully Implemented, Including Hospitals, Hotels, Clubs, Industrial Facilities, Luxury Residential Buildings, Colleges, Institutes And Important Government Buildings.

## Hot Water Boiler Systems

Boilers are manufactured from heat-treated steel according to international specifications, and for some other purposes, they are manufactured from heat-treated stainless steel

## Steam Boiler System

Supply and installation of steam boilers of all capacities - steam return tanks - compensation tanks - steam collectors - and installation of blasting (cooling off) tanks - pressure reducer assemblies - steam traps - steam and return networks

## Fire Sensing And Fighting Systems

A fire extinguishing system is a planned, professional equipment designed to detect and fight fires in a variety of environments and facilities. This system includes a group of devices and equipment that work together to detect the occurrence of a fire and its potential spread, thus reducing damage and maintaining the safety of individuals and property.

**Fire Detection And Fire Fighting Systems Including Sprinklers, Foam, Gases Such As FM 200 & NOVEC**
