About Teyo

...

was founded in 2021 and managed by an expert team specializing in organic seeds and herbs. Today, it has become one of Egypt's prominent suppliers of organic food ingredients, to the world.

Teyo Group is a producer and exporter of the highest quality organic seeds, herbs, and spices. Our core strength lies in our control over the entire supply chain. We are the only certified organic processor of organic hulled sesame in Egypt.

The company owns and operates 3000-square-meter processing facilities on two different locations. We cooperate with wide range of trusted farmers network across Egypt to ensure a consistent supply of the finest products year-round.

Our Vision

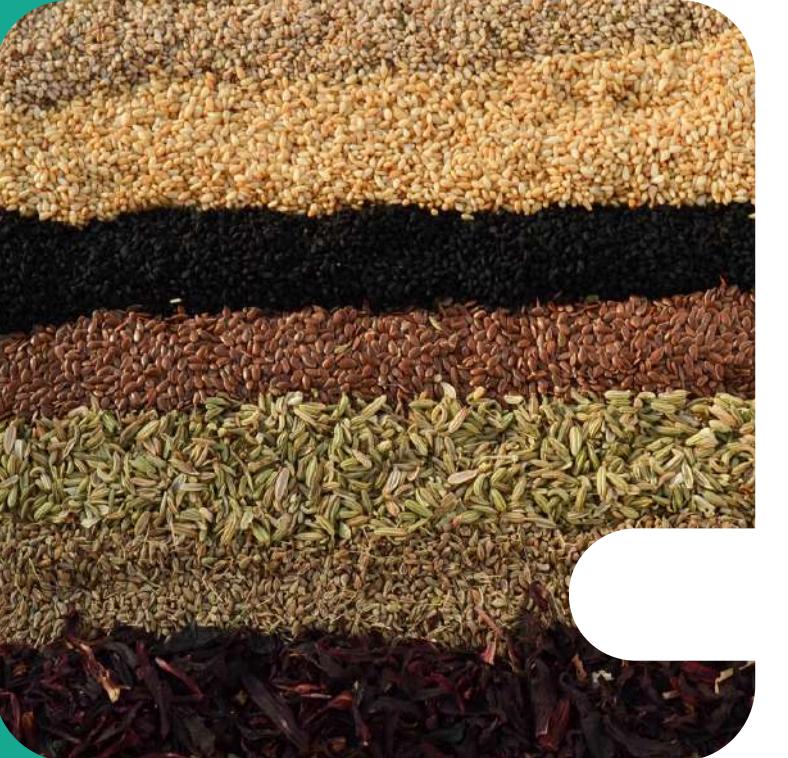

To be the global benchmark for excellence in organic food ingredients, delivering unparalleled quality and innovation from Egypt's fertile lands.

Our Mission

At Teyo Group, we are dedicated to consistently delivering the highest quality seeds, herbs, and spices year-round, meeting our customers' diverse needs. We believe in a sustainable value chain where people thrive, the planet flourishes, and long-term success is shared by our customers, employees, and shareholders." We stand out as a leader in the organic food industry, distinguished by a commitment to quality, sustainability, and ethical practices.

Why Us

Organic Excellence

As the only certified organic processor of organic hulled sesame in Egypt, Teyo Group ensures supplying the highest quality maintaining to be "Globally Trusted" Supplier.

State-of-the-Art Technology

Our modern facility boasts a cutting-edge hulling line equipped with the latest mechanical technology, guaranteeing efficient and consistent processing.

Automated Production

All our production lines are fully automated, minimizing human intervention and ensuring maximum hygiene and safety throughout the entire process.

Uncompromising Quality Control

We collaborate with renowned European laboratories like Primoris Lab and TLR to conduct rigorous product testing, adhering to the most stringent European regulations.

Why Us

Third-Party Inspection

To further enhance customer confidence, we offer third-party sampling and inspection through Control Union Egypt, ensuring independent verification of product quality.

Expert Team

Our experienced and well-organized team possesses in-depth knowledge of the organic food industry, ensuring smooth operations and exceptional customer service.

Traceability and Transparency

We maintain a transparent and traceable supply chain, from cultivation to customer, allowing for complete transparency and trust.

Fair Trade Practices

We prioritize ethical and fair practices, paying above-average market prices to our growers, empowering them to improve their livelihoods, the thing that ensures long term partnerships.

Our Facilities

From Seed to Shelf: Our State-of-the-Art Preparation Process

This multi-step process reflects our unwavering commitment to quality and our dedication to providing you with the finest organic ingredients.

1. Sifting Perfection:

Our journey begins with meticulous sifting. High-precision machines gently separate impurities like dust, dirt, and foreign matter, ensuring a clean foundation for the subsequent steps.

2. Size Reduction with Precision:

Next, our powerful crushers carefully reduce the size of the materials, optimizing them for further processing while preserving their valuable nutritional content.

3. The Indented Cylinder: Separating by Size and Shape:

• • •

The indented cylinder plays a crucial role in separating materials based on their size and shape. This step ensures uniformity and enhances the overall quality of the final product.

4. Gravity Table: Harnessing Natural Forces:

Our gravity tables utilize the principle of density to separate materials. Lighter impurities are gently moved away, while heavier, desired components remain, ensuring a high degree of purity.

5. Color Sorting: A Visual Guarantee of Excellence:

Finally, our sophisticated color sorter meticulously analyze each individual piece, identifying and rejecting any off-color materials. This final step ensures a visually appealing and consistently high-quality product.

6. Metal Detection: Uncompromising Safety:

Food safety is paramount. Our advanced metal detectors scan every batch, swiftly identifying and removing any trace of metal contaminants, safeguarding both product quality and consumer health.

Hulling Line

From Seed to Shelf: Our State-of-the-Art Preparation Process

As the exclusive producer of organic hulled sesame in Egypt, we operate a 500 SQM facility equipped with a cutting-edge hulling line featuring advanced sprayer technology. This ensures maximum product dryness with minimal moisture content. We guarantee exceptional purity exceeding 99.95% and offer a diverse range, including both Organic Hulled Sesame and Organic Roasted Hulled Sesame, all produced to the highest quality standards.

Our Products
